

THE APPLICATION OF GENERATIVE ARTIFICIAL INTELLIGENCE IN TEACHING ENGLISH AS A SECOND LANGUAGE

GenAI tools not only improve learners' accuracy and self-directed learning but also help them overcome communication anxiety and develop flexible language skills. Based on clarifying key concepts and classifying GenAI categories, this paper analyses several applications of GenAI in teaching English as a second language (ESL) effective GenAI applications, propose some effective solutions for applying GenAI in teaching English and a structured roadmap step for step -by- step to integrate GenAI into the curriculum to help students approach English as a second language naturally in the context of globalization today.

Từ khóa

Generative Artificial Intelligence; English as a Second Language; Personalization of learning; Communication Skills; Secondary education
